

Meal Buddy

Sean Cann, Edrei Chua, Jun Suh, & Taeho Sung

The Idea

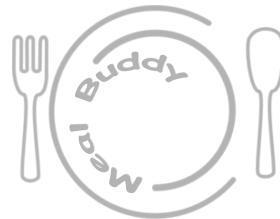

Let's grab a meal!

You select the location and time (or give us your schedule), class year and major of the person (or don't care!) and we assigned you to a mystery buddy (or you can choose to eat with a friend)!

P.S. this is not a dating app

- Make arranging meals hassle-free
- Platform to get to know more people on campus
- Easily set up meals with any of your friends!

Why is Meal Buddy a Good Idea?

- Oriented towards freshmen who often have no one to eat with
- Upperclassmen can branch out and expand their social circles
- Easy for friends with busy schedules to coordinate a good meal time
- Students can get advice from faculty/staff over a friendly meal!

Business Model

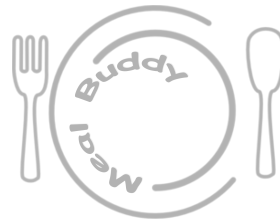

Strategy:

- Free to download
- Revenue from:
 - In-app advertisements
 - Getting acquired (exit strategy)

Long Run Timeline:

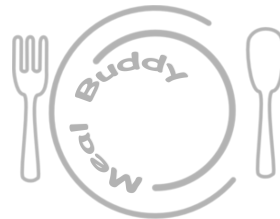

- **Currently:** Finished demo of Android version
- **16X & 16F:** Test Android app at Dartmouth College & improve
- **Winter break:** Develop and release iPhone version
- **17W and beyond:** Expand marketing to other campuses

User Feedback

We've gathered user-input from over 50 Dartmouth students

- People really like the new UI
- Positive feedback on the user-friendliness and usefulness on campus

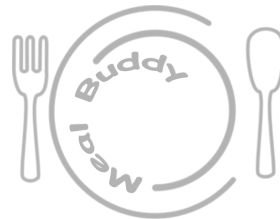

Competitive Edge

Down To Lunch:

- Very simple app
- #2 most downloaded app (iOS, April 23)

Tap 1 button to hang 🍷

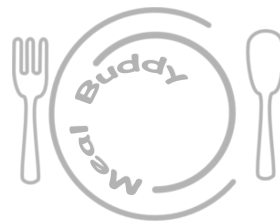

Competitive Edge

There are a few other dining apps out there:

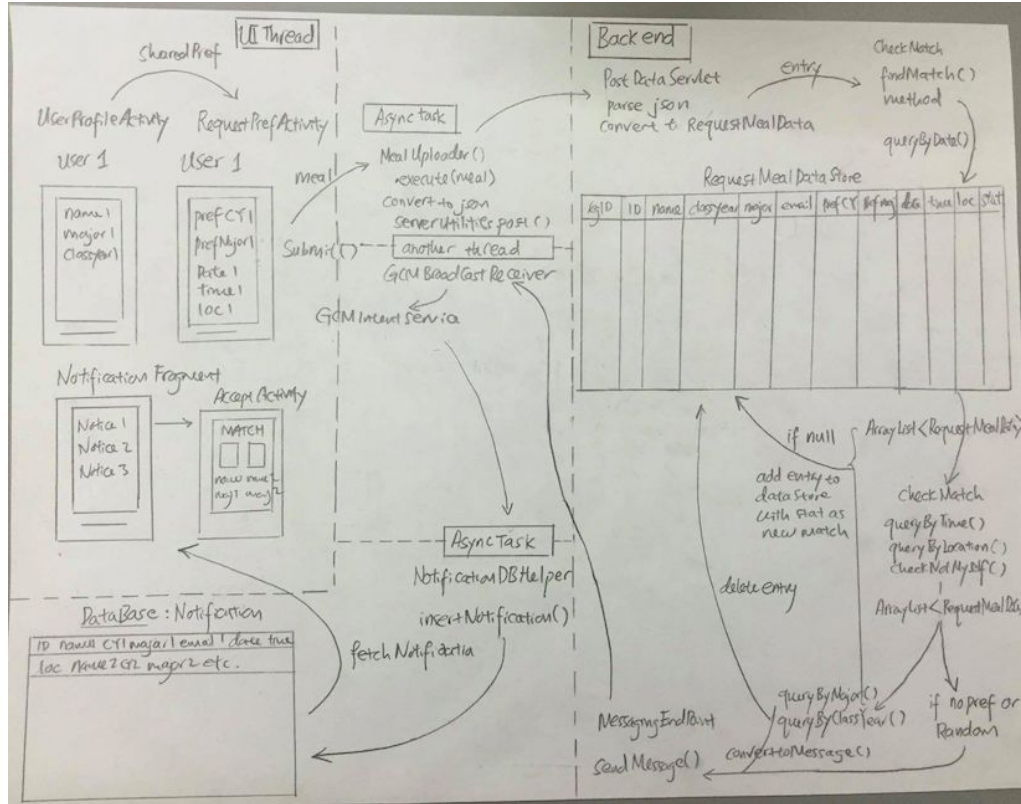

- Grouper, LeftoverSwap, EatWith

How Meal Buddy is different:

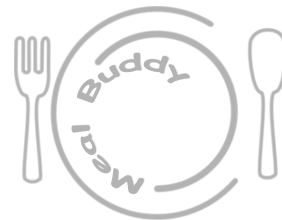

- Focuses on only college students
- Allows you to match with strangers on campus

Threaded Diagram

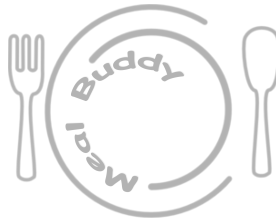

- UI Thread - UserProfileActivity, RequestPrefActivity, NotificationFragment, AcceptActivity
- AsyncTask - MealUploader, NotificationDBHelper
- Backend - PostDataServlet, CheckMatch, RequestMealDataStore, RequestMealData, query

DEMO TIME!!!

Helpful Features

- ✓ Facebook authentication 
- ✓ Dining hours 
- ✓ Dining menus 
- ✓ Check if email is dartmouth.edu address 
- ✓ Alarm and notification 

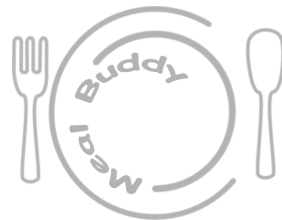

Lessons Learned

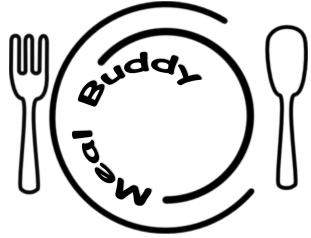

- Developed a better understanding of using Git and merging code
- Learned how to divide tasks and work individually/in pairs most efficiently
- Applying knowledge from class to new concepts and ideas
- Errors and bugs can truly come from the most unexpected places!

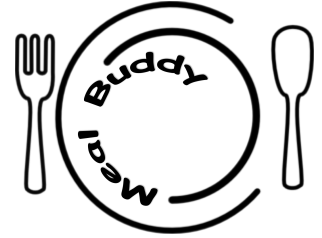

Divide and Conquer: Who Did What?

- Sean Cann: Main UI design, Debugging
- Edrei Chua: Datastore (app engine), Debugging
- Jun Suh: Datastore (app engine), UI design, Debugging
- Taeho Sung: Database, menu and hours, Facebook authentication, Debugging

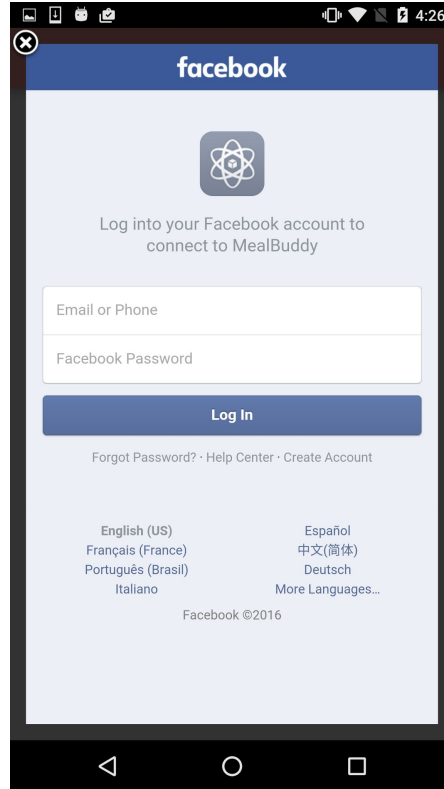

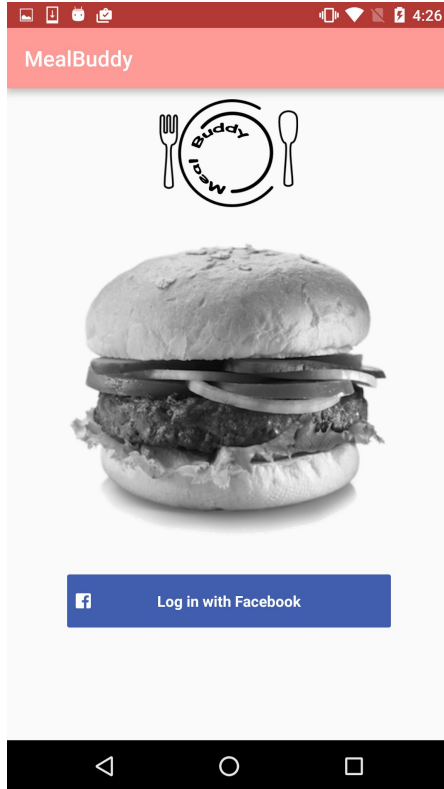

Thank You!

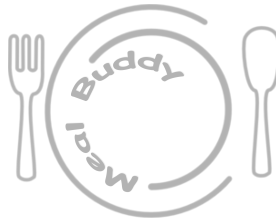

Supplementary Slides

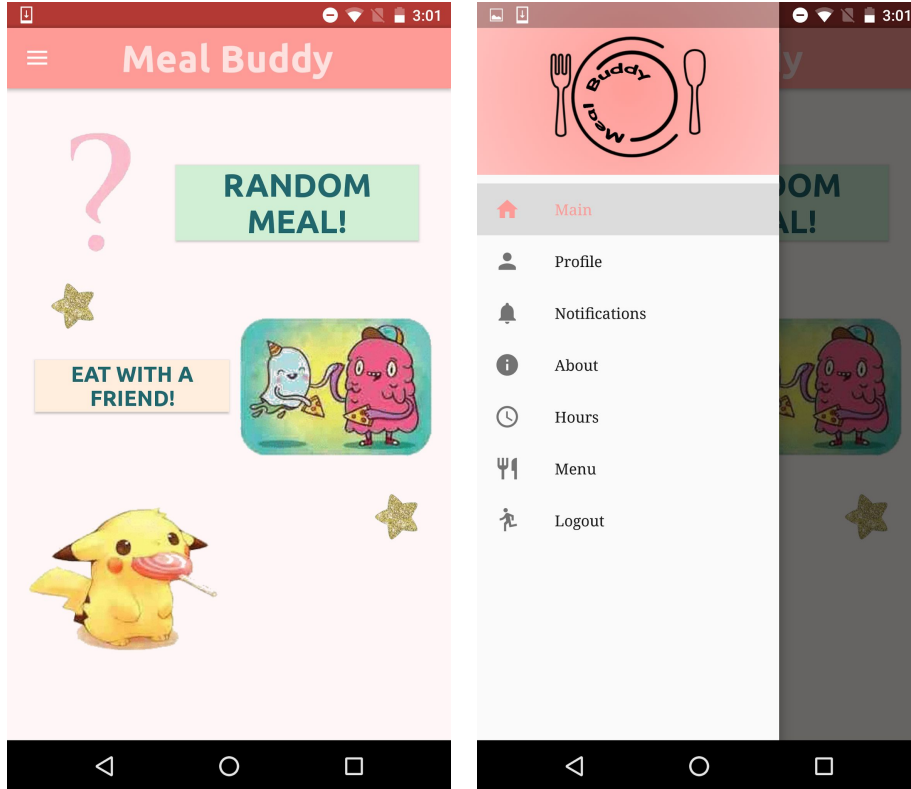

User Interface - Welcome Screen

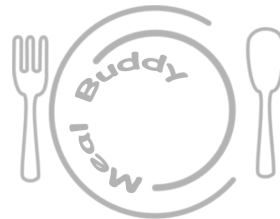

- Users must use Facebook to log into Meal Buddy!
- Will set the profile's default name to the Facebook user's name to deal with people fabricating their names

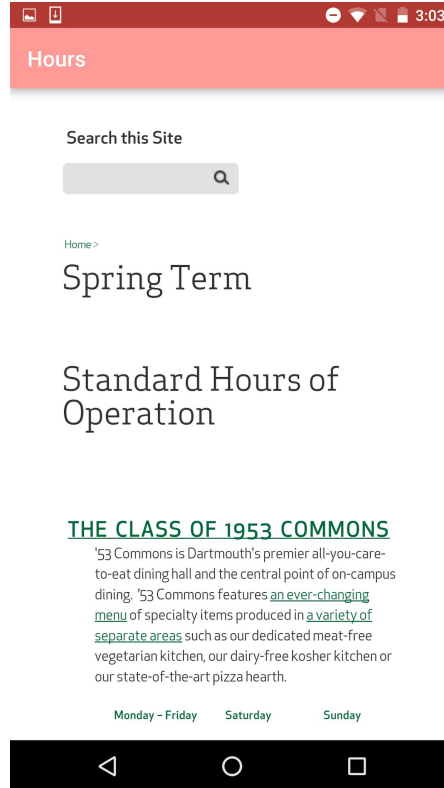

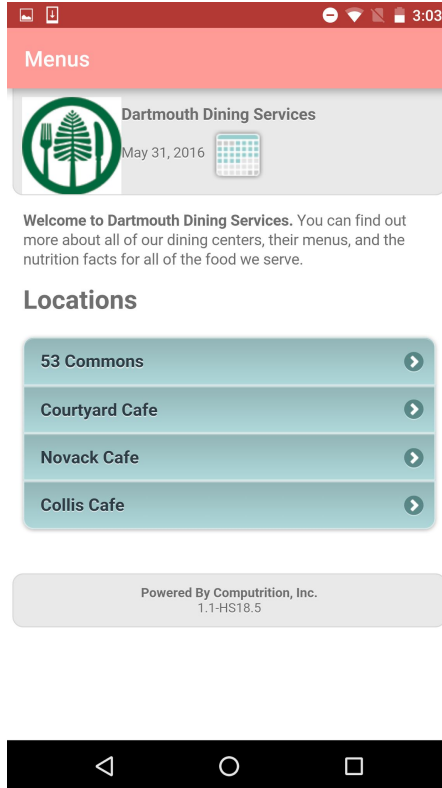

User Interface - Easy Navigation

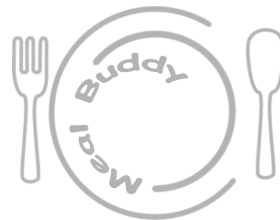

- Simple, attractive, and intuitive user interface
- Navigation Drawer - can easily switch between different fragments/activities
- Match with a stranger depending on preferences OR grab a meal with a friendly face with a few clicks!

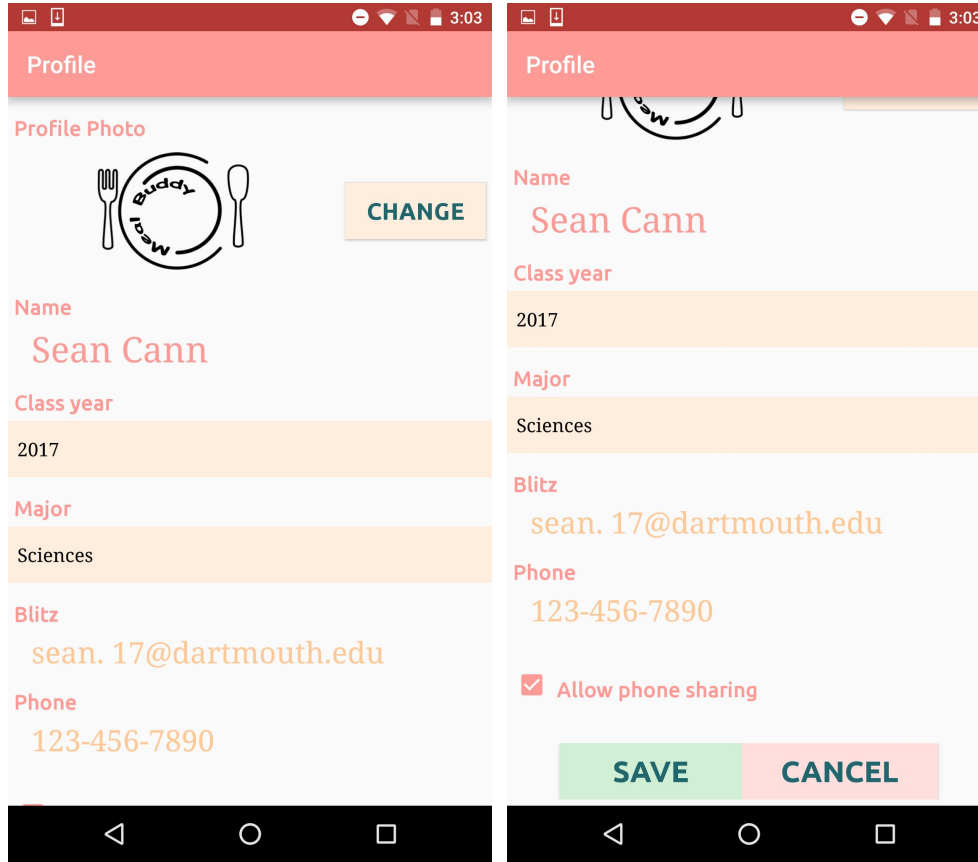

User Interface - Dining Location, Menus, and Hours

- WebView to display School's dining menus by locations and their respective hours
- Back button for the WebViews take you to the previous webpage (instead of the most previous activity)
- Can be conveniently checked before submitting a request

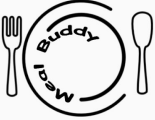

User Interface - User Profile
